Add an app name

This is the app name that will show on your My Apps page and associated with your app ID. You can change the name later in Settings.

WhatsApp Test 13/30

App contact email

This is the email address we'll use to contact you about your app. Make sure it is an address you check regularly. We may contact you about policies, app restrictions or recovery if your app is deleted or compromised.

gupta.sandeepkumar.p@gmail.com

Business Account - Optional

Connecting a Business Account to your app is only required for certain products and permissions. You'll be asked to connect a Business Account when you request access to those products and permissions.

No Business Manager account selected

By proceeding, you agree to the [Meta Platform Terms](#) and [Developer Policies](#).

Previous Create app

Note: WhatsApp word can not be provided as part of the App name so use different name. And click Create App.

Core Coders Test 16/30 ⚠️

Certain terms like "whatsapp" are not allowed. For example, you may not use our trademarks or brand elements (including FB, Face, Book, Insta, Gram, and Rift) or any confusingly similar terms in your app name if such term is, or could be perceived as, a reference to Facebook or its brands. We ask that you only submit an app name appeal if you have reviewed all applicable policies and believe you are in compliance. Please note that we rarely grant app name appeals.

App contact email

Meta

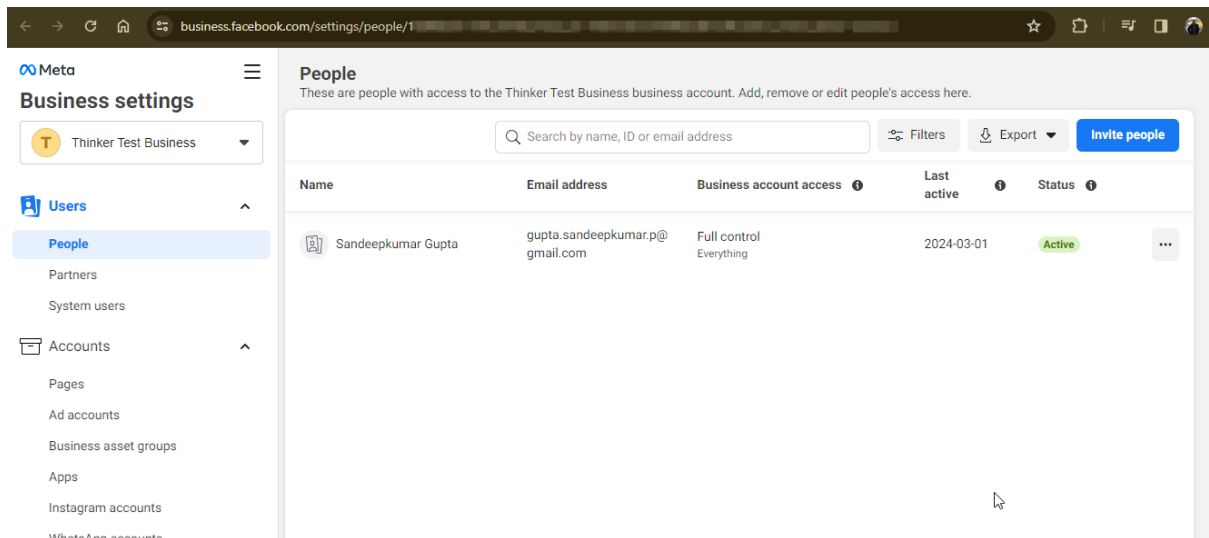

Click create an account. Provide the Business and account name and your name. Click Submit.

The screenshot shows a web browser window with the URL `business.facebook.com/overview/?business_creation_redirect_uri=https%3A%2F%2Fdevelopers.facebook.com%2Fapps%2F1362648261088297%2Fw...`. The page features the Meta logo and a large modal titled "Create your business account in Business Manager". The modal contains three sections: "Your business and account name" with the input "Thinker Test Business", "Your name" with the input "Sandeepkumar Gupta", and "Your business email address" with the input "gupta.sandeepkumar.p@gmail.com". A "Submit" button is at the bottom right of the modal. The background of the page shows a blurred view of the Meta Business Suite interface.

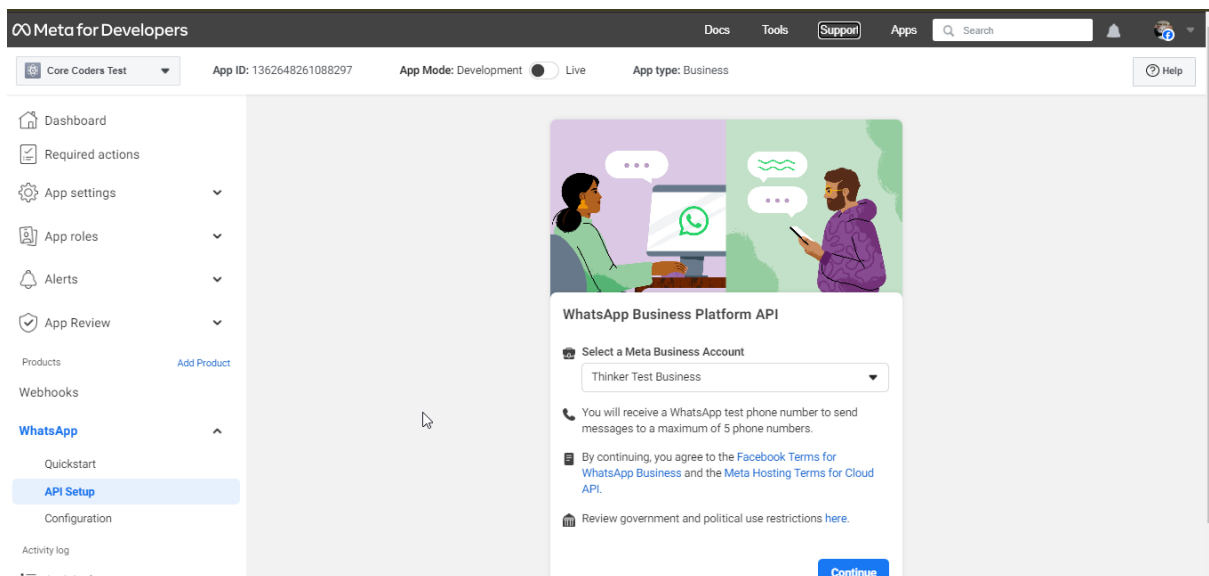

Click Done. Check your email inbox and confirm your email address.

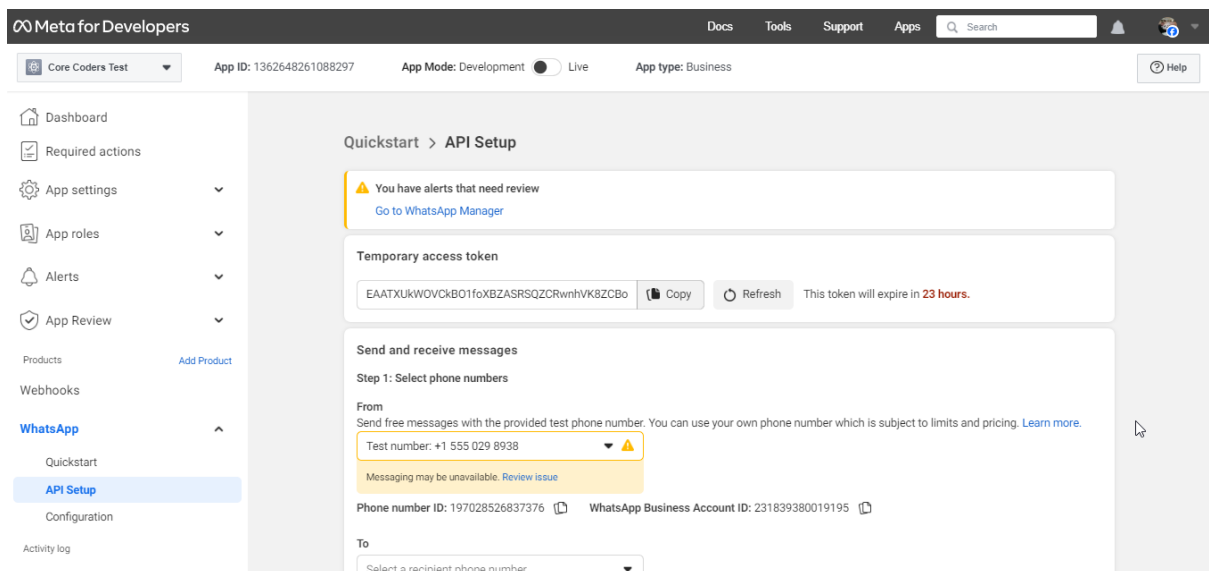

Once email is confirmed, we may see as below.

Click on continue from the previous window.

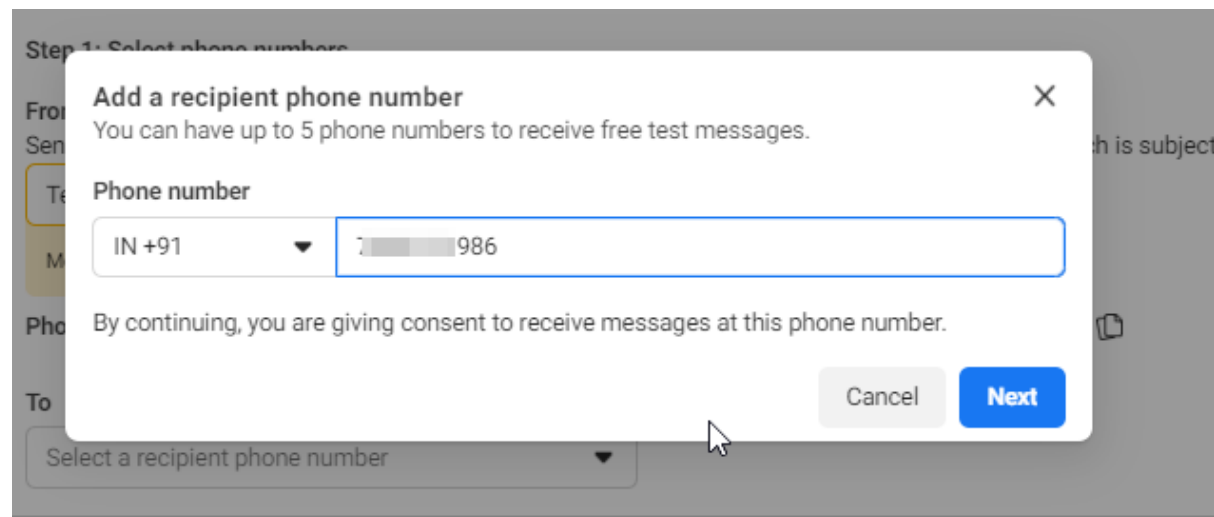

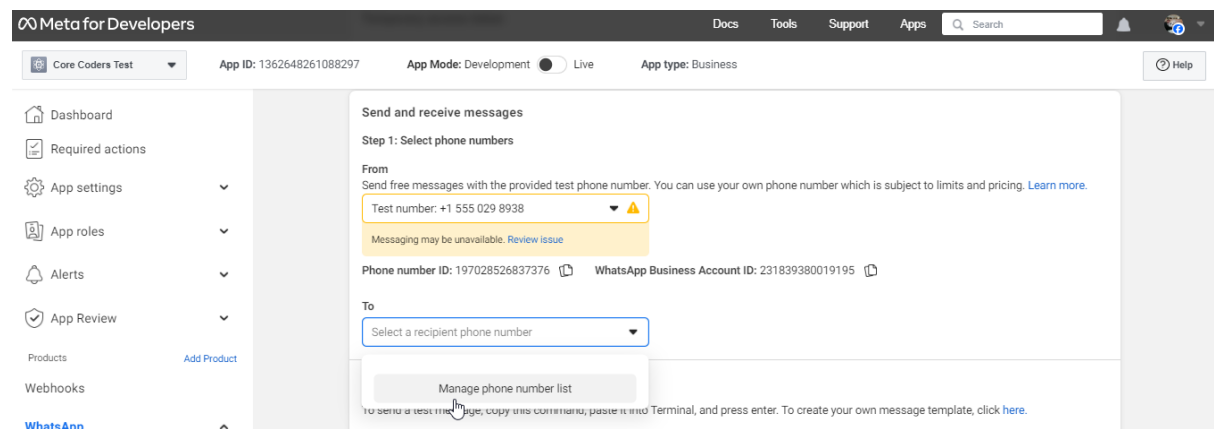

You will see.

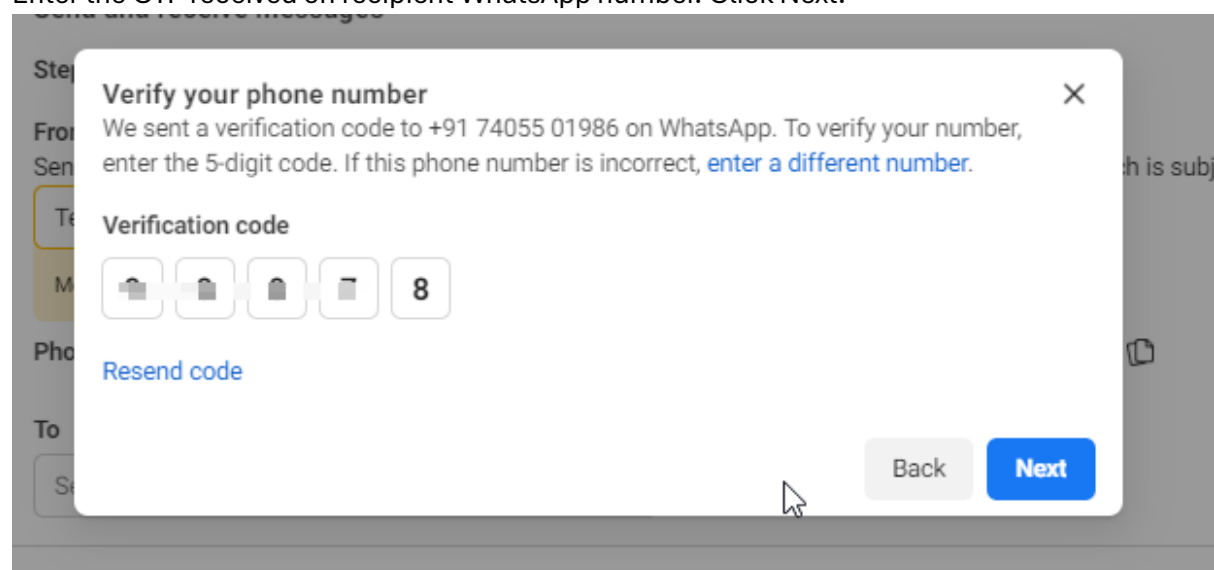

This is the most important page where we setup the From Test phone numbers from which the messages are sent, and we set up the “To” phone numbers.

Add To phone numbers i.e. recipient phone number.

Enter the OTP received on recipient WhatsApp number. Click Next.

Click on Send message to test the send message.

Step 2: Send messages with the API

To send a test message, copy this command, paste it into Terminal, and press enter. To create your own message template, click [here](#).

```
1 curl -i -X POST `
2 https://graph.facebook.com/v18.0/197028526837376/messages `
3 -H 'Authorization: Bearer
4 [REDACTED]00oQc4qryo6HAEITtmnwBnssorMxW
5 -H 'Content-Type: application/json' `
6 -d '{ \"messaging_product\": \"whatsapp\", \"to\": \"[REDACTED]\", \"type\": \"template\", \"template\": { \"name\":
7 \"hello_world\", \"language\": { \"code\": \"en_US\" } } }'
```

 Run in Postman

Send message
